

Tower mesh comparison and actual 30-mode participation

RUN-T026-032 / 034 / 035; common Gravity equilibrium and unchanged source properties

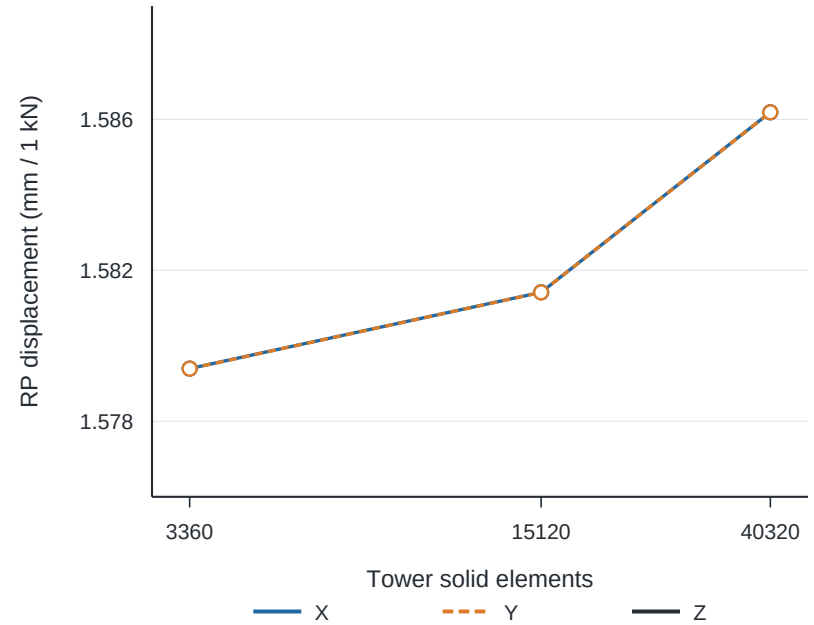

Mode 1 Mode 2 Mode 3 Mode 4

X load / U1 Z load / U3

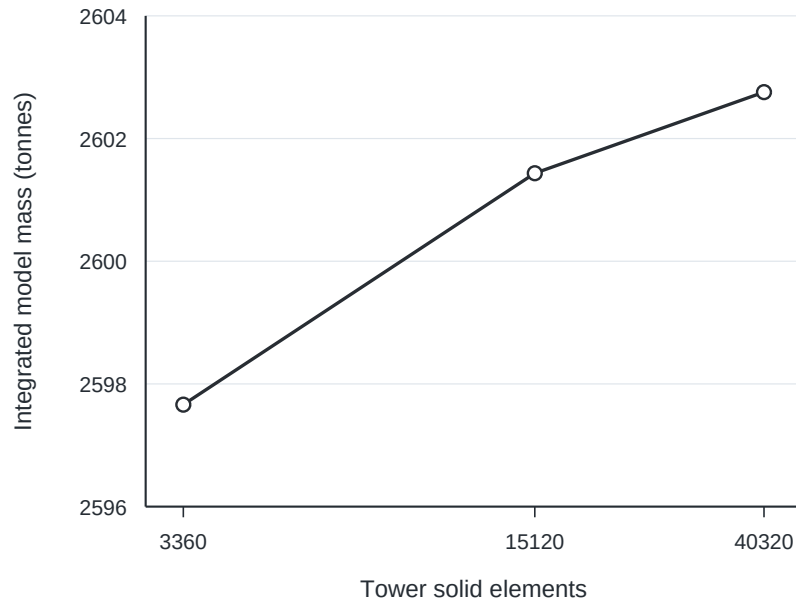

(a) First four horizontal modes

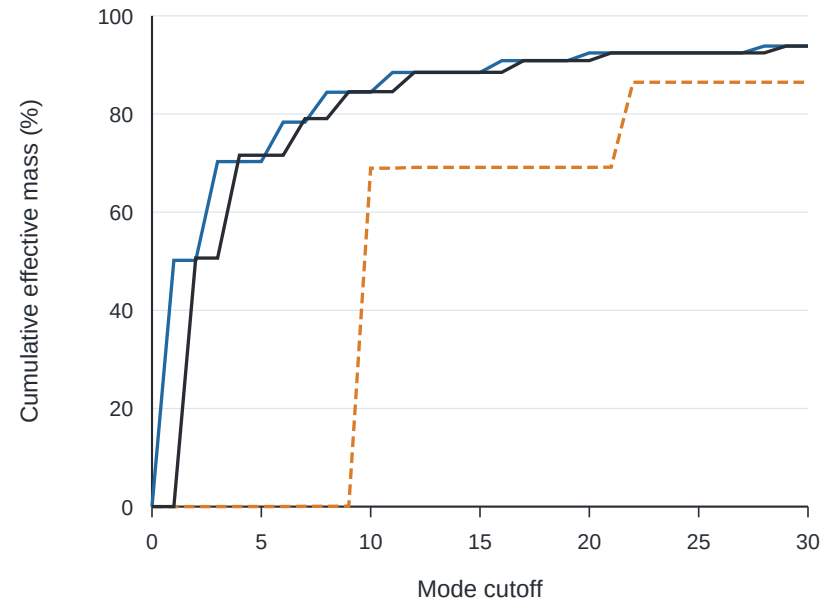

(b) Tangent flexibility

(c) Geometry discretization diagnostic

(d) M3: all 30 modes / total mass

M2 -> M3: frequencies 0.045-0.170%; X/Z flexibility 0.301%; frozen 0.5% budget passed.

M3: X/Y/Z coverage = 93.843 / 86.468 / 93.845%; residual mass remains. Linear-base-state scope.
